About Fortify Institute

Fortify Institute, based in Ireland, is a leading name in cyber security education. Renowned for its live, online courses in cyber security, information security, cloud security, and ethical hacking, Fortify Institute offers top-notch training to professionals worldwide. Developed by industry experts, our curriculum focuses on practical skill sets, real-world scenarios, and emerging technologies. Our commitment to excellence has been rewarded with training partnerships with leading certification bodies including EC-Council, CompTIA and Cloud Security Alliance.

Fortify Institute Training - Current Offerings

Certified Cloud Security Knowledge (CCSK)

This course is widely recognised as the standard of expertise for cloud security and provides a cohesive and vendor-neutral understanding of how to secure data in the cloud. The CCSK Certificate is validated by the Cloud Security Alliance (CSA).

Certified Ethical Hacker (CEH)

The EC-Council Certified Ethical Hacker (CEH) Master course offers an exciting opportunity to become a proficient ethical hacker and advance your career in the ever-evolving world of cybersecurity. Course includes CEH Knowledge Exam and CEH Practical Exam.

Cybersecurity for SMEs

This course is based on common questions from business owners and managers. What are the threats and what can we do to put controls and countermeasures in place to implement the beginnings of a cybersecurity strategy.

Fortify Institute Services

- ## Online Training

  Our online courses are delivered live, allowing your students to learn from anywhere. Our experienced trainers will engage with your team in real-time, providing interactive and engaging training sessions.

- ## Contract Trainers

  We can provide experienced trainers to deliver your courses, either in-person or online. Our trainers have extensive experience in their respective fields and will tailor their approach to meet the unique needs of your organization.

- ## Training Consultancy

  We can create bespoke courses for your organization, designed to be delivered live, on-demand, or hybrid. Our team of experts will work with you to understand your specific training needs and develop a tailored program that meets your requirements.

- ## Executive Training

  Cybersecurity training is essential for leaders and executives to understand the risks and implications of cyber threats. We offer executive training programs that focus on providing the knowledge and skills necessary to make informed decisions and mitigate risks.

Jan Carroll - Founder

I founded Fortify Institute during lockdown as I was frustrated by the cyber skills gap and lack of diversity in the industry. Nearly two years on I have the best job in the world. I get to combine my passions of cybersecurity and education to deliver quality, engaging, flexible training in cybersecurity, information security, cloud security and ethical hacking to all.

Testimonial

Padraigh Griffin

As a C-level executive and an alumnus of the Fortify Institute, I have found it to be an exceptional educational and training institution. My experience there provided me with priceless academic and personal growth, and I would consider it highly favorable to continue my academic journey at the institute. I wholeheartedly encourage others to do the same.

5 star review for Jan. I attended a course in Cyber Security given by Jan through the UCD professional academy. Jan is an excellent lecturer and always on hand for assistance to her students. She makes learning interesting and different. She is a very experienced and knowledgeable teacher. I would highly recommend any course with her!
